I am demonstrating how to join a new colour in a granny square, but the technique is the same for joining a new colour at the beginning of a row.

Bring the tail over your working yarn.

Written in US crochet terms.

Insert hook in corner space of Round 1.
Yarn over colour B.

Pull up colour B, keeping your
finger on the tail at the back of
square.

Chain 1, still keeping finger on the tail at back of square.

Bring the tail over your working yarn.

Chain 1. (Two chains made). The tail is now caught within the second chain stitch.

Chain 1. (Three chains made. Counts as first DC of Shell)

Tail over working yarn.

After first Yarn Over of DC,
bring tail over working yarn.

After first Yarn Over of second DC, bring tail over working yarn.

Complete DC (two DC made). Tail over working again.

Two chains. Corner made.
Continue to bring tail over until it is
completely caught within stitches.

As you can see, all you have to do is bring the
tail of the new colour **OVER** the working
yarn, thereby catching it within the starting
chain and following stitches.

In stead of two tails to weave in for each
colour, you now only have one. :-)
